Creation of the Universe

Primary Creation of the UNIVERSE –

1. Sri Krishn takes first expansion as Sankarshan.
2. From Sankarshan, first chaturvyuh of **V**asudev, **S**ankarshan, **P**radumn and **A**nirudh appears.
3. From above Sankarshan, Bhagwan Narayan appears.
4. Bhagwan Narayan further expends its second chaturvyuh of **V**asudev, **S**ankarshan, **P**radumn and **A**nirudh.
5. From this **Sankarshan**, Karanodakshayi Vishnu form appears.
6. Karanodakshayi Vishnu further creates Trillions of Universes through his skin pours and transfer himself to each of such universe as Garbhodakshayi Vishnu and further expand himself as Kshirodakshai Vishnu (Parmatma) in the heart of each and every living entity.

24 Elements of the UNIVERSE –

1. Sound is the First element that comes from Ether.
2. When Ether interacts with touch, it creates Air.
3. When Air mixes with form property, it creates Fire.
4. Fire when interacts with taste, it forms water.
5. When water interacts with smell, it form Earth element.
6. Ears, Skin, Eye, Tongue and Nose are the five gyanendrias that are ruled by its respective devtas as shown in the chart above.
7. Hands, feet, mouth, genitals and Anus are the five Karmendriyas, again ruled by their respective devtas.
8. These are the 20 Elements, then mind, Intelligence and False Ego becomes 23.
9. Jeeva shakti (Chetna) is 24th element. Kaal shakti of Lord Krishna is 25th Element.

Explanation of MAHAT TATV formation

- After destruction (Pralay) all universe goes into the navel of Mahavishnu and all 24 elements remain there as in Unmixed state or Inactive state called as PRADHAAN. Also called as mool prakriti.
- Parmatma with his own will, Glances on this PRADHAAN and make it active. This is called Mahat Tatv (First active mixed state of 24 elements).
- Mixing of these elements is done by Kaal shakti or Kali devi.
- Mahat tatv is originally in Satoguna, but to create Srishti, it has to mix with Tamoguni (False Ego).
- Now this Mahat tatv mixes with 3 modes of nature -Satoguna, Rajoguna and Tamoguna and creates other 22 elements of Srishti.
- Mahat tatv mixed with Satoguna creates MIND + 10 Sense controlling devatas.
- Mahat tatv mixed with Rajoguna creates Praan shakti + 10 senses + Intelligence
- Mahat tatv mixed with Tamoguna creates 5 Tanmatra +5 Panchbhoot Elements.
- 5 Karmendriyan are created from Praan shakti & 5 Gyanendriyan are created from Intelligence
